Sage Enterprise Intelligence. Powerful advanced business intelligence

As the amount of data businesses are collecting continues to grow, it's more important than ever to find a way to both manage and make sense of it all. To gain that competitive edge, companies need to find a way to convert all of their data into tangible insight and opportunities.

Sage Enterprise Intelligence (SEI) is the missing Business Intelligence link. It s the BI solution of choice for over 2,200 global Sage customers, with simple to use, yet powerful, analytical and reporting capabilities. You can finally go beyond the limits of spreadsheets to get a real time view of your data and transform it into meaningful information. You can connect to ERP transactional data and get the intuitive tools you need to deliver fast and accurate analysis.

Leveraging BI and ERP integration, you ll reduce the time to decision making and improve the coordination of operations across your organization. As the only BI solution purpose built to integrate seamlessly with Sage s suite of products, SEI combines the power to manage even the most complex business data with an ease of use unmatched in the industry.

The benefits

1. **Gain visibility and insight**
   Measure the performance of your organization and the different factors that impact your business and make data driven decisions faster.

2. **Empower all users**
   SEI empowers all employees, technical and nontechnical, and removes the barrier of relying on IT to provide users with the reports they need to do their job.

3. **Collaborate securely**
   SEI provides a suite of collaboration tools to help you share the right information with internal and external stakeholders.

4. **Achieve quick ROI**
   SEI provides out of the box views and dashboards tailored to your ERP system, with everything you need to analyze your enterprise s performance.

Sage

The solution

Prepare
